DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by H.R. Anderson et al. (US/3,418,485)

Anderson et al. discloses an air duct for use with a portable power module trailerable over public roads (easily can be mounted to flat bed for trailering over roads), the portable power module including a container (31) having an air inlet and housing a gaseous fuel motor (turbine 33) drivably connected to an electrical power generator (34) capable of producing at least approximately one megawatt of electrical power, the air duct comprising: a body (32) positionable adjacent to the air inlet on the container to at least partially define a first opening and a second opening, the first opening defining a first opening dimension and being parallel to a first direction and the second opening being at an angle to the first direction, the body further defining a first body dimension in the first direction and a second body dimension in a second direction that is at least substantially perpendicular to the first direction, the first body dimension being greater than the second body dimension. The first body dimension is measured inward of drawing one, second body dimension would be horizontal in the second opening. (0
